Asana AI

Asana AI

✓ **Prebuilt AI Teammates (coming soon!)**
  Collaborate with AI that helps deliver real results

✓ **Intake with Slack and AI Studio**
  Capture work requests in Slack

✓ **Asana App in Claude**
  Turn AI chats into actionable work in Asana

Tackle complex work with **prebuilt AI Teammates** (coming soon)

Overview
Work with AI that understands your unique needs and acts as an extension of your team - integrating directly into the flow of work to help you deliver real results.

Key benefits
- Launch campaigns and strategic initiatives faster than ever with prebuilt AI Teammates - including Campaign Brief Writer, Workflow Optimizer, Compliance Specialist, and more.
- Go to market faster, scale operations for greater impact, and flag compliance risks early.

Key use cases
- Campaign management
- Process improvement
- Compliance controls management
- Strategic planning
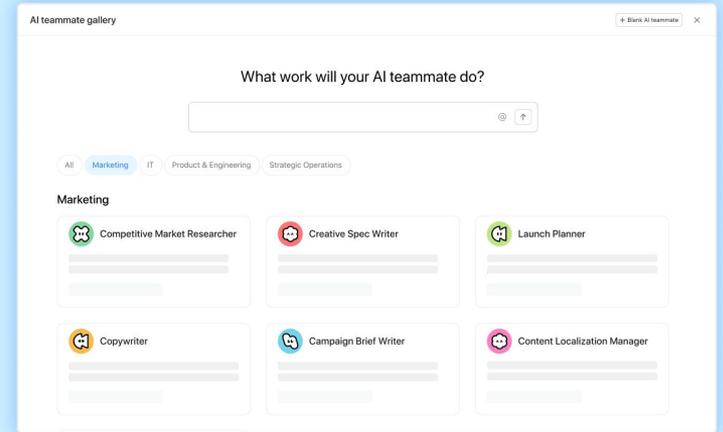

How it works
Access prebuilt AI Teammates in the AI Teammate Gallery. Each prebuilt AI Teammate has a specific focus and is tailored to workflows and use cases across marketing, operations, IT, and more.

asana

Manage work requests directly from **Slack with AI Studio**

Overview
Capture requests in Slack and automatically convert them into structured work in Asana.

Key benefits
- Ensure work doesn't get buried or lost in messages and conversations.
- Reduce time spent from intake to delivery.

Key use cases
- Campaign management
- Creative production
- Product launches
- Strategic planning

How it works
Connect Slack to AI Studio and configure the workflow by specifying the message or channel triggers.

Workflows & automation

Workflows & automation

Enhancements in the rule builder
Manage complex rule logic

Rule duplication
Duplicate existing rules

Automatic AI model selection
Build rules that work best for you

Scheduled triggers
Automate routine workflows

Saved views in project templates
Kick off new projects faster

Portfolio duplication
Drive consistency in structure

Shared project access with portfolios
Standardize permissions

Expanded custom field limits
Track data across complex projects at scale

Modes (coming soon)
Navigate work with greater focus

Manage complex rule logic with **enhancements in the rule builder**

Overview
Reuse the branches or branching logic in the rule builder, without having to manually recreate them from scratch.
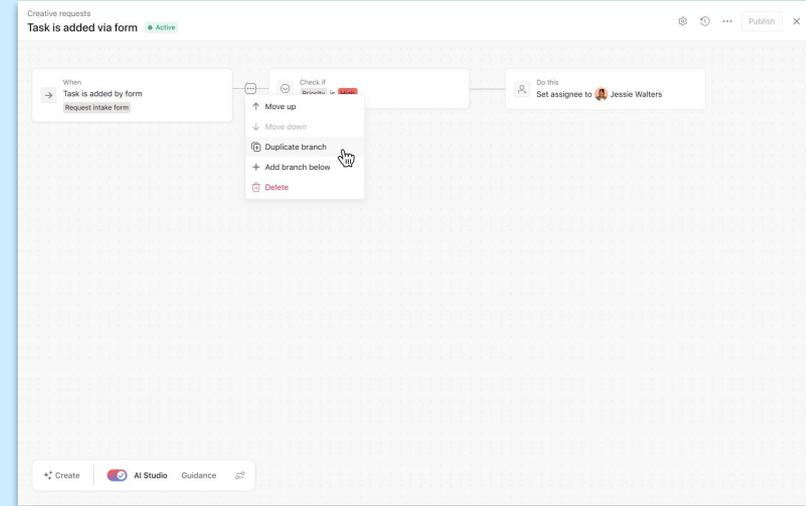

Key benefits
- Build out or refine automated workflows by duplicating existing logic branches.
- Easily reorder rules to align with changing needs and processes.

Key use cases
- Project management
- Strategic planning & portfolio management

How it works
In the rule builder, reorder and duplicate branches as needed.

asana

Save time with **rule duplication**

Overview
Ensure operational consistency with the ability to duplicate rules within and across projects.
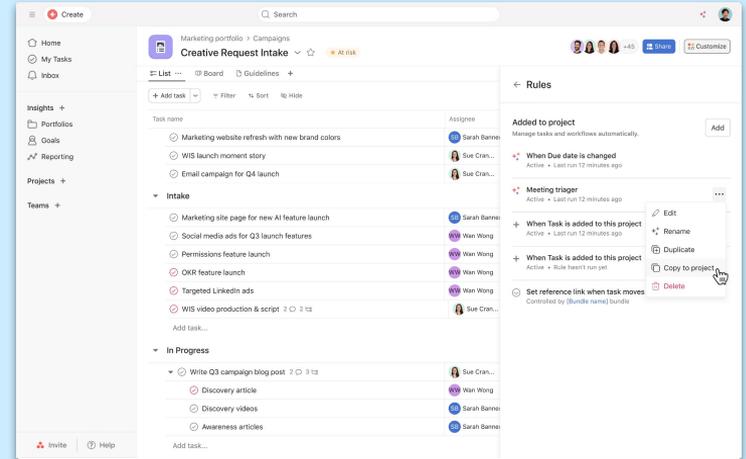

Key benefits
- Implement proven rules and automations across workstreams.
- Eliminate the repetitive work of rebuilding or modifying rules for every new project.

Key use cases
- Project management
- Strategic planning & portfolio management

How it works
Duplicate rules within and across projects using the rule builder or customize menu.

asana

Build rules that work best for you using the **automatic AI model selection**

Overview
Remove the guesswork and friction from building rules with AI-powered automations that provide optimal results.
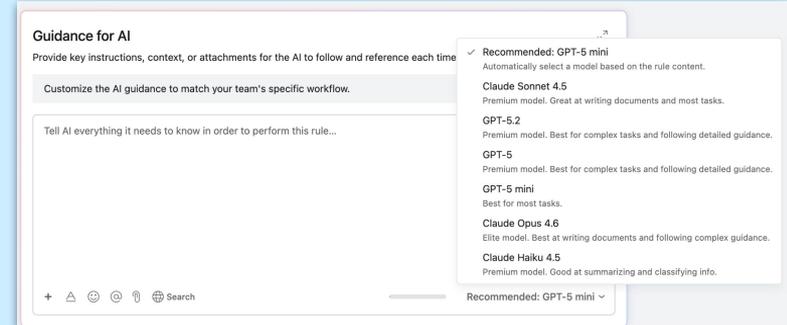

Key benefits
- Ensure effective use with the automatic selection of the best-fit model.
- Reduce complexity in rule setup and workflow design.

Key use cases
- Project management
- Strategic planning & portfolio management

Guidance for AI
Provide key instructions, context, or attachments for the AI to follow and reference each time

Customize the AI guidance to match your team's specific workflow.

Tell AI everything it needs to know in order to perform this rule...

✓ Recommended: GPT-5 mini
Automatically select a model based on the rule content.

Claude Sonnet 4.5
Premium model. Great at writing documents and most tasks.

GPT-5.2
Premium model. Best for complex tasks and following detailed guidance.

GPT-5
Premium model. Best for complex tasks and following detailed guidance.

GPT-5 mini
Best for most tasks.

Claude Opus 4.6
Elite model. Best at writing documents and following complex guidance.

Claude Haiku 4.5
Premium model. Good at summarizing and classifying info.

Recommended: GPT-5 mini ⌄

How it works
In the rule builder, select the 'Recommended' option to have the most efficient AI model be used.

asana

Automate routine workflows with **scheduled triggers**

Resources

Overview
Execute rules and automations on a daily, weekly, monthly, or custom schedule. Automatically generate tasks, reminders, or follow-ups and draft status updates with AI on a recurring basis.
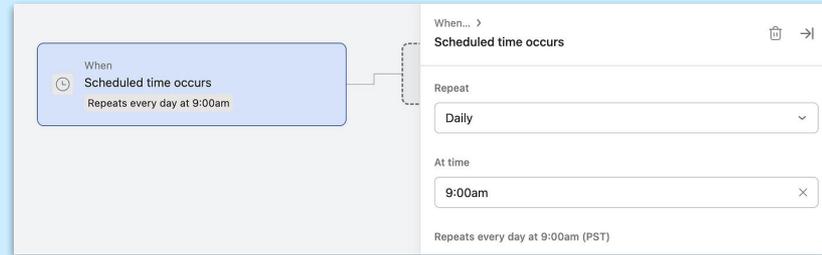

Key benefits
- Automate routine work on a predictable cadence.
- Reduce manual work and missed steps.
- Standardize workflows at scale with consistent, repeatable automations.

Key use cases
- Request tracking
- Project management
- Product launches

When
Scheduled time occurs
Repeats every day at 9:00am

When... >
Scheduled time occurs

Repeat
Daily

At time
9:00am

Repeats every day at 9:00am (PST)

How it works
In the rule builder, select the 'Every time period' trigger and set the ideal cadence.

asana

Kick off new projects faster with **saved views in project templates**

Overview

Project templates can now retain your saved views and settings for filters, sorts, as well as view options, enabling teams to kick off work faster—no manual setup required.
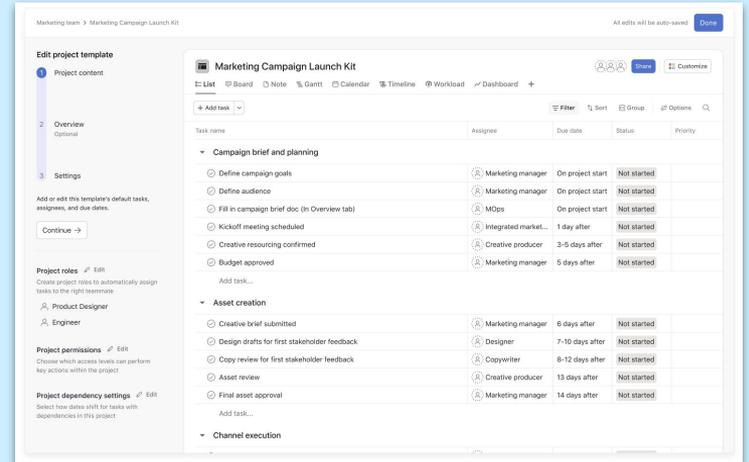

Key benefits
- Reduce project setup time by preserving tab structure and view configurations in project templates.
- Standardize how teams view and manage work.
- Prevent errors stemming from manual recreation of complex project settings.

Key use cases
- Project management
- Request tracking
- Event planning

How it works

In the project template builder, you can add, rename, and reorder the tabs. You can also edit and set the relevant 'View' options.

asana

Structure recurring workflows with **portfolio duplication**

Overview
Quickly create new portfolios from existing ones. Enable teams to standardize the structure and planning without having to rebuild portfolios from scratch.
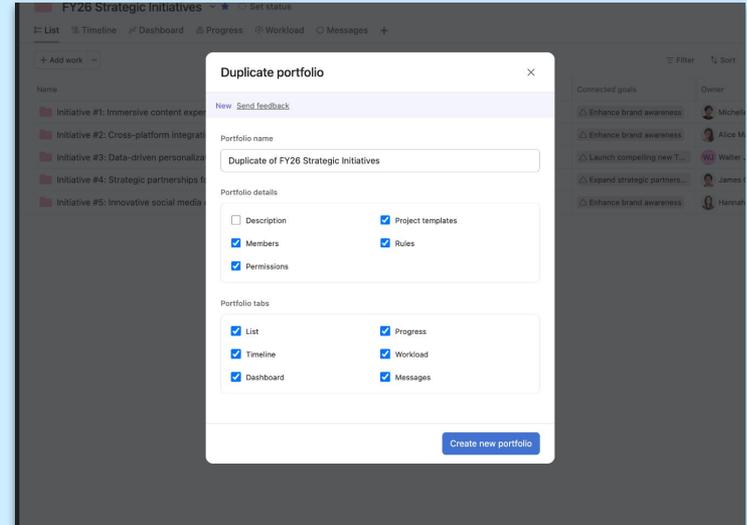

Key benefits
- Scale portfolio management more efficiently without repetitive configuration.
- Reduce potential for error or inconsistencies in workflow setup and reporting.

Key use cases
- Strategic planning & portfolio management
- Resource management
- Business reviews & reporting

How it works
From a portfolio, select the 'Duplicate' action from the dropdown to create a new copy.

asana

Standardize project permissions with **shared project access with portfolios**

Overview
Ensure that the right people have the right access to the right workstreams.

Key benefits
- Standardize setup and project access for teams and stakeholders.
- Keep user permissions consistent across connected portfolios and projects.
- Enjoy smoother change management with updates made at the portfolio level automatically syncing to the project.

Key use cases
- Campaign management
- Resource management
- Project management
- Onboarding

Share Summer Marketing Launch

Manage access for portfolio members

Portfolio members do not automatically have access to the projects within it. Choose whether members of the following portfolios have access to this project. Each member's access level will match their access level in the portfolio. Learn more

Marketing Initiatives — Shared with Alpha, Inc — Same as portfolio ⌄
Strategic Planning — Shared with Alpha, Inc — No access ⌄
Marketing Request Inbox — Private — No access ⌄
Private portfolio — No access ⌄

Copy project link

How it works
Select 'Manage access' at the bottom of the share modal for the product and choose the portfolio(s) to which you'd like to share access. All current portfolio members will be added.

asana

Capture and report on robust data across projects with **expanded custom field limits**

Overview
Track critical details across complex projects at scale. Projects can now support up to 150 custom fields, giving teams the flexibility to capture more structured data.

Key benefits
- Make better-informed decisions.
- Drive robust reporting across projects and workflows.
- Manage large-scale portfolios of work.

Key use cases
- Campaign management
- Resource management
- Strategic planning & portfolio management

Navigate work with greater focus with **modes**

Overview
Modes (coming soon!) will enable you to focus on the work that matters most. The enhanced navigation helps teams create a more focused experience and layout in Asana.
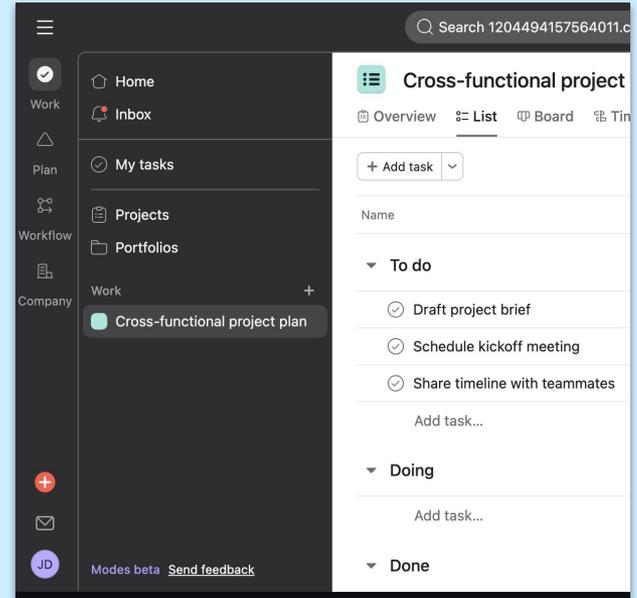

Key benefits
- Improve focus and productivity with a sidebar tailored to your current work.
- Quickly access the right projects, portfolios, or objects in Asana.
- Move faster from planning to execution.

Key use cases
- Project management
- Request tracking
- Strategic planning & portfolio management

How it works
The updated sidebar will automatically group key surfaces into dedicated modes, including workflow, work, company, and plan.

asana

Goal management

Goal management

✓ Enhanced custom fields on goals
Monitor goal progress

✓ Goal updates & notifications
Exercise greater control over communication

Monitor goal progress with **enhanced custom fields on goals**

Overview
Empower teams to manage goal tracking and progress with greater confidence and operational efficiency.

Key benefits
- Gain instant clarity and visibility around the progress of goals.
- Ensure goals are standardized and easy to share across your organization.

Key use cases
- Strategic planning & portfolio management
- Business reviews

How it works
Proceed to the goal to which you'd like to add a custom field. Create a new custom field or browse the library to choose from existing custom fields.

asana

Exercise greater control over **goal updates and notifications**

Overview
Choose whether to send a notification when inviting others to a goal. Users can also set default preferences so they only get the updates they care about.
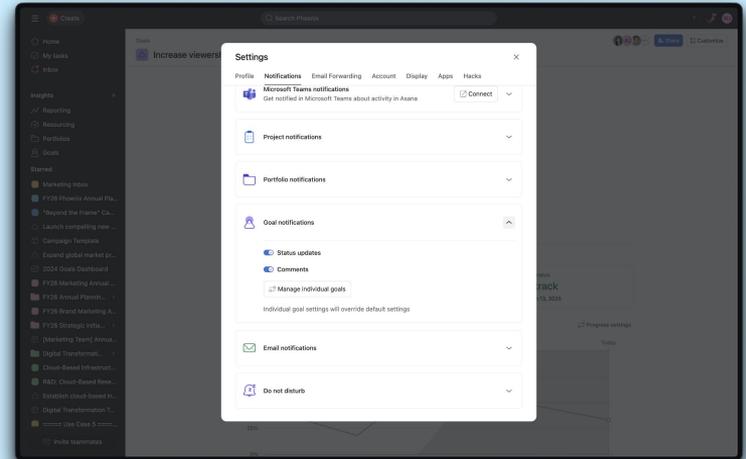

Key benefits
- Improve team focus by reducing noise & notification overload
- Manage goal visibility across the organization
- Customize preferences for updates on goal activity

Key use cases
- Strategic goal setting & tracking
- Business reviews & reporting

How it works
When creating or sharing a goal, users can choose whether to send a "share" notification to invitees. Users can also set default goal notification preferences in their profile.

asana

Business reviews & reporting

Business reviews & reporting

✓ **Project & portfolio status updates**
Communicate work outcomes clearly

✓ **Expanded custom field limits**
Track data across complex projects at scale

Communicate work outcomes clearly with **project & portfolio status updates**

Overview
Projects and portfolios can now be marked as dropped or completed, enabling teams to report on the work with greater accuracy.
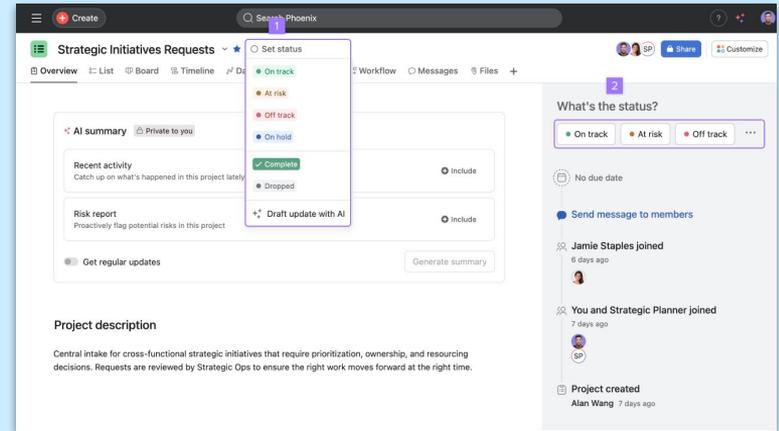

Key benefits
- Provide more reliable status rollups and visibility across workstreams.
- Improve stakeholder and cross-functional alignment.
- Drive accurate reporting based on actual outcomes.

Key use cases
- Strategic planning & portfolio management
- Business reviews & reporting
- Project management
- Campaign management

How it works
When posting a status update at the project and/or portfolio level, you can choose to select 'Dropped' or 'Complete'

asana

Capture and report on robust data across projects with **expanded custom field limits**

Overview
Track details and key data across complex projects at scale.

Key benefits
- Make better-informed decisions.
- Drive robust reporting across projects and workflows.
- Manage large-scale portfolios of work.

Key use cases
- Campaign management
- Resource management
- Strategic planning & portfolio management

asana

Integrations

Integrations

✓ **Intake with Slack and AI Studio**
Capture work requests in Slack

✓ **Asana App in Claude**
Turn AI chats into actionable work

Manage work requests directly from **Slack with AI Studio**

Overview

Capture requests in Slack and automatically convert them into structured work in Asana.
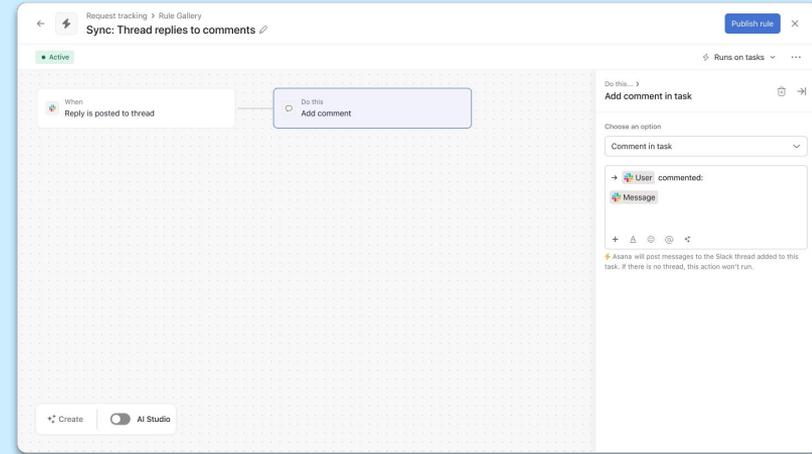

Key benefits

- Ensure work doesn't get buried or lost in messages and conversations
- Reduce time spent from intake to delivery.

Key use cases

- Campaign management
- Creative production
- Product launches
- Strategic planning

How it works

Connect Slack to AI Studio and configure the workflow by specifying the message or channel triggers.

asana

Turn AI chats into actionable work with the **Asana App in Claude**

Overview
Enable teams to create Asana projects and tasks directly from conversations in Claude. Assign the work to the right people, and see the status of initiatives in real time.

Key benefits
- Preview and generate projects directly from the chat.
- Ensure critical details are captured and structured for clear next steps.

Key use cases
- Project management
- Campaign management
- Onboarding
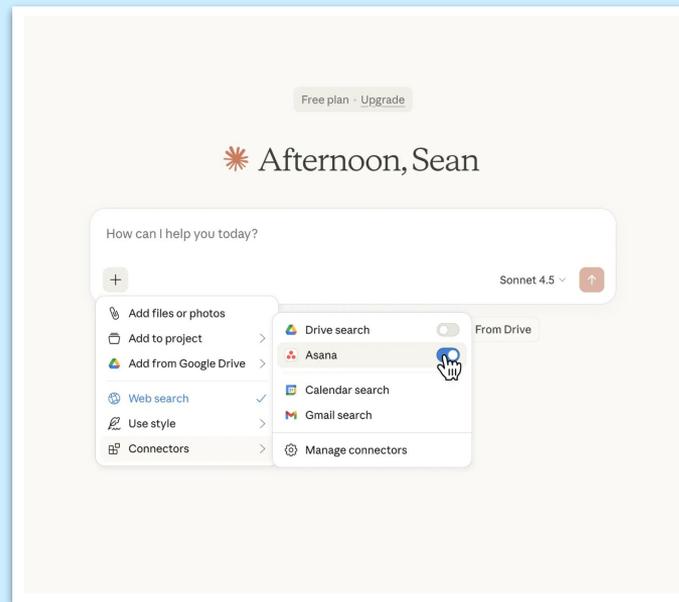

How it works
Connect Asana to Claude by adding it as a connector. You can then create Asana projects and tasks, check on the status of work, and more within Claude.

asana

Admin controls

Admin controls

✓ Release preview in the admin console
Preview and test upcoming Asana features

✓ Team content permissions for admins
Control who can send team-wide messages

Test new features in the admin console with **release preview**

Overview
Enable super admins to preview and test upcoming Asana features in a sandbox or primary domain before general availability, maximizing confidence and control.

**Key benefits**
- Increase predictability and control of new features or product updates.
- Enhance workflow adoption and readiness by validating features in Asana prior to broad access.
- Build organizational confidence.

Key use cases
- Admin controls & security

How it works
In the admin console, super admins can view and enable eligible features and product updates that are coming soon.

Provide admins with governance over **team communication & content**

Overview
Team admins can control who can send new messages to teams, improving governance and preventing unwanted broadcasts.
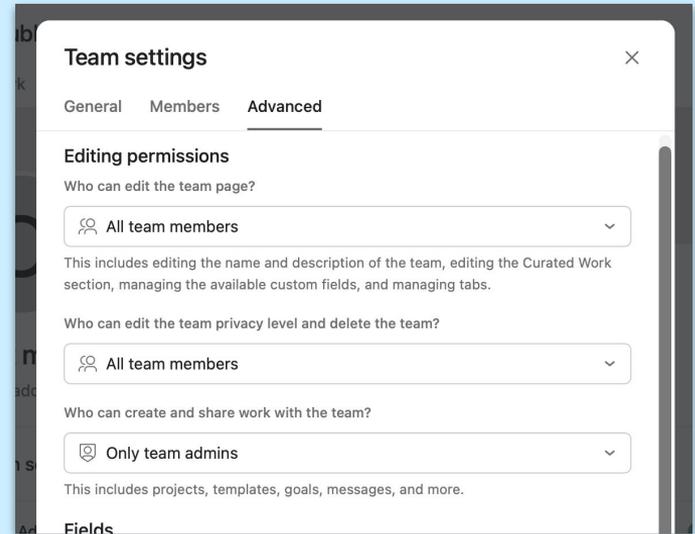

Key benefits
- Prevent team-wide spam and notification overload.
- Support for consistent and centralized communication.
- Enhance user experience and focus by limiting unnecessary disruptions.

Key use cases
- Project management
- Onboarding

Team settings   ✕

General   Members   **Advanced**

Editing permissions

Who can edit the team page?

👥 All team members   ⌄

This includes editing the name and description of the team, editing the Curated Work section, managing the available custom fields, and managing tabs.

Who can edit the team privacy level and delete the team?

👥 All team members   ⌄

Who can create and share work with the team?

👤 Only team admins   ⌄

This includes projects, templates, goals, messages, and more.

Fields

How it works
Toggle the setting to 'Only team admins' to ensure that just the team admins can send and share team-wide messages.
